DETAILED ACTION

Claim Objections

1. Claim 21 is objected to because of the following informalities: on the first line "encoided" should be –encoded--. Appropriate correction is required.

2. Claims 1-5 and 16-20 objected to because of the following informalities: According to MPRP 2111.04 and 2106C, "configured to" or "operable to" makes the claim limitation following the term optional and does not require the steps to be performed. Appropriate correction is required.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 21 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 21 is directed to descriptive material per se because it is not capable of causing functional change in a computer. The computer program is not executed by a computer to permit the function of the descriptive material to be realized. See "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility".

Art Unit: 2616

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35
U.S.C. 102 that form the basis for the rejections under this section made in this
Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims 17 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Caronni (US 6,507,908 B1).

With respect to claim 17, Caronni discloses a network element, comprising a routing unit (Figure 3 Element 102) to route detected special data packets (column 7 lines 47-49, a secure packet is a special packet), and determine instructions for the special packets (column 7 line 47 – column 8 line 35). After the packet is detected, an analysis device (Figure 3 Element 301) determines a securelPaddress using a database (Figure 3 Element 307), the address translation device (Figure 3 Element 302) translates the address and the encryption/decryption unit (Figure 3 Element 303) encrypts or decrypts packets. The routing unit then sends the packet to the translated address.

With respect to claim 19, Caronni discloses wherein the special data packets are encrypted and the address is translated (column 8 lines 13-24).

Application/Control Number: 10/070,212

Art Unit: 2616

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Caronni (US 6,507,908 B1) in view of Carr et al. (US 6,600,744 B1).

Caronni does not disclose an external charging entity.

Carr discloses a packet classifier to determine instructions for a special packet, including determining a billing class for the packet (column 3 lines 10-13). The packet classifier inherently communicates with an external charging entity to maintain billing information for packets.

Caronni and Carr are analogous because they are from they are from the same field of endeavor of determining instructions to route detected special data packets.

At the time of the invention, it would have been obvious to a person of ordinary skill in the art for the routing unit of Caronni to connect to an external charging entity.

The motivation for doing so would have been to bill the proper amount for routing special data packets (column 12 lines 34-46).

Application/Control Number: 10/070,212

Art Unit: 2616

Allowable Subject Matter

Page 5

8. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. Claims 6-15 are allowed.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jordan Hamann whose telephone number is
